Climate Change^d

“The Rising Impact of Landscape Architecture and Planning”

As the climate crisis continues to shape our collective futures, UW-Madison alumni Matt Baumgarten, BLA '04, will explore current climate best practices and our evolving role as landscape architects. Using research and case studies from his work at one of the nation's largest practitioners, Matt will summarize SWA's approach to climate sensitive work, adaptation, and resiliency.

Matt Baumgarten, PLA, ASLA

Design Principal, SWA Group, Houston, TX

For nearly two decades, Matt Baumgarten's interest in large-scale natural systems planning and design has resulted in resilient landscapes with lasting cultural and environmental impact. His design style focuses on the creation of immersive experiences that are grounded in ecological science and seek to convey a softer, more contemplative sense of place.

Thursday, February 15th
